Mohammad Merajul ISLAM, Rajshahi College, Bangladesh

**FROM META-TECHNOLOGICAL ARTIFICIAL INTELLIGENCE
TO MULTILINGUAL PHYLOGENY**

Artificial Intelligence and **LLMs**

LLMs are needed for AI to learn and become “intelligent”

No problem in technical fields:

- ⊗ very stable language(s)
- ⊗ stereotyped language
- ⊗ already translated

YET, problems with user’s instructions: passive in English, infinitive in French, imperative in French, shall/should in English, etc.

Nevertheless, standard equivalence scales can be devised.

Haunting syndrome: **Boeing 737 Max**

LLMs, HOW BIG?

A **several-trillion**-data-point LLM

Developers access protected
intellectual property.

Do not pay for **copyright**.

They are **looting** Intellectual Property.

An LLM must be in **a single language**.

How many languages in the world can
have **a homogeneous three-trillion**
LLM?

Six? Nine? Twelve?

There are 7,500 languages in the world

Most languages exist in varied dialects.

BIG LLMs and problems

1. English 19 national types listed by Microsoft
2. French 14 national types listed by Microsoft
3. Spanish 23 national types listed by Microsoft
4. Portuguese 2 national types listed by Microsoft
5. Chinese 5 regional types listed by Microsoft

6. Japanese 1 national type listed by Microsoft
 7. AI only looks for the **top statistical** results. Microsoft
 8. Deep Learning = **majority bias**. type listed by Microsoft
 9. Arabic 16 national types listed by Microsoft
- Result: **Homogenization**, loss of style & originality.
Result: **doubtful subtitling**: “rightful” becoming “rifle” in a western film.
The famous **“niggardly”** row in

Washington DC, 27 years ago. Not better than AI

HOMOGENIZING UNIFORMITY

Statistics Average Standard

All **individual styles** are lost
All **local or regional dialects**
are lost

All **local languages** are
isolated & lost

Dramatic effects on
dialectalized languages

7,488 languages are eliminated
Go through one of the top languages

AI-Translating machines

Homogenized within these top languages

Top languages are hybridized

**Global English! Über alles! Premier de
cordée!**

Case of **China**

Dialectalized Chinese

Several languages: Uyghur, Mongolian, Tibetan
& many local languages

Case of **Arabic**

Dialectalized reality

Religious unity BUT many Turkic languages,
Indo-Iranian Farsi, Indo-Aryan Urdu, Bangla, Hindi,
& Dravidian Tamil & others

+ Quranic Arabic.

TERNARY REALITY

Language is ternary (Saussure)

Paradigmatic

Syntagmatic

Phylogenic (Philology)

Three articulations

Phonetic: rotation C-V

Morphological: time, place, modal
capture

Syntactic: Agent, Theme, locational
modulations

Three Agentive orientations

Ergative: patient-theme-oriented

Agentive: agent-oriented

Passive-reflexive: thematized-agent-
oriented.

Reductive Universal Grammar

Diktat from **André Martinet**: two articulations

Double-entendre from **Gustave Guillaume**:
“Tenseur Binaire radical” with two tensors and
one inverting, eventually wide, threshold

Systematic binary approach of **Noam Chomsky**:

$$\mathbf{S = NP + VP}$$

All extensions are binary extensions within VP:

$$\mathbf{VP = V + extensions}$$

Extensions = theme, or location

Location = time/space position, or modal
assessment

Within AI, **true-false logic, or absurd**

**“Colorless Green Ideas Sleep
Furiously.”**

OBSESSIONAL BINARISM

Every element is divided into two possible options at the deeper level in the derivation, seen as a logical and unescapable architecture

Green Eggs and Ham

Do you like green eggs and ham?

I do not like them, Sam-I-am.
I do not like green eggs and ham!

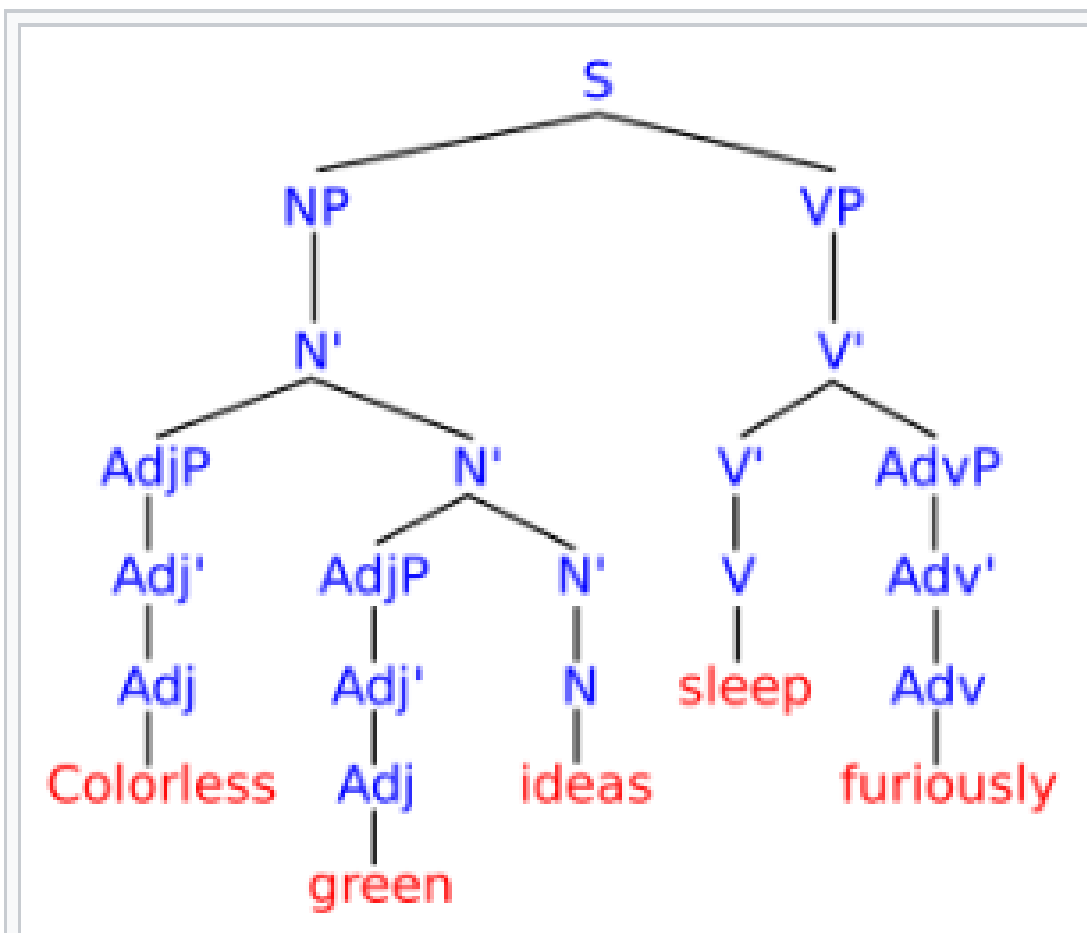

Would you like them here or there?

I would not like them here or there.
I would not like them anywhere.

I do so like green eggs and ham!
Thank you! Thank you,
Sam-I-am!

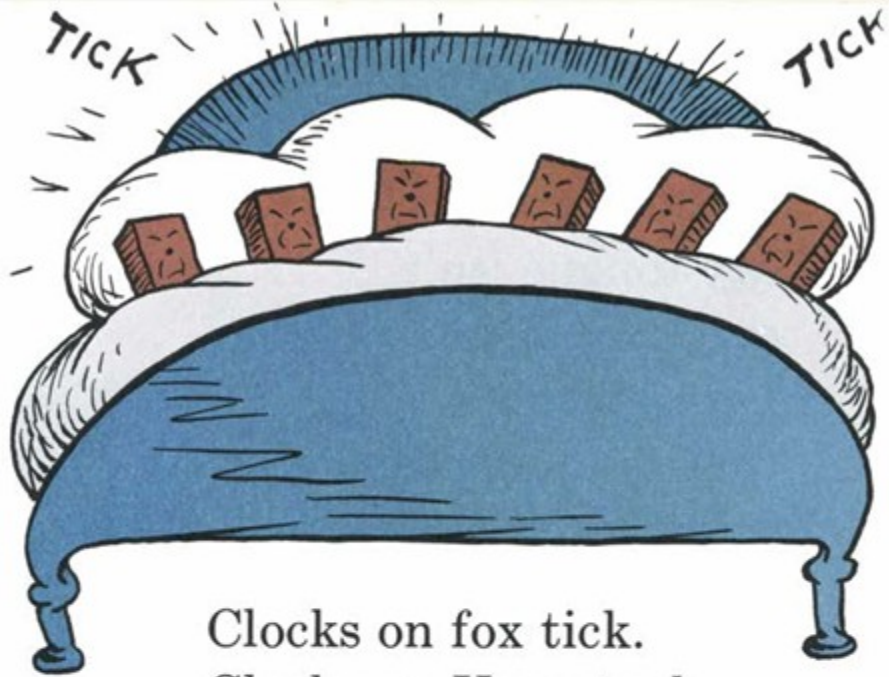

Theodor Seuss Geisel

[https://allpoetry.com/poem/11575855-Green-Eggs-and-Ha](https://allpoetry.com/poem/11575855-Green-Eggs-and-Ham)

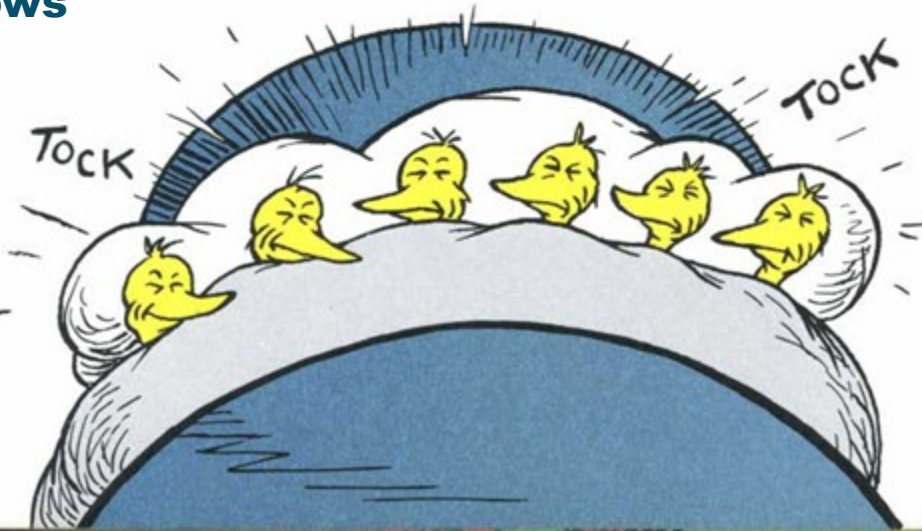

Approximate X-bar representation of
Colorless green ideas sleep furiously. See
Phrase structure rules.

WELCOME TO
A SHIFTING WORLD
ABSURD THOUGH REAL
UNIMAGINABLE BUT SURREAL
NIGHTMARISH AND HAUNTED
COLORLESS GREEN INDEED
PEACEFULLY FURIOUSLY
DELIRIOUS

Clocks on fox tick.
 Clocks on Knox tock.
 Six sick bricks tick.
 Six sick chicks tock.

FOUR
pillows
FIVE
pillows

Dr. SEUSS, Fox in Socks

Everything goes in **pairs, couples, twos**
 Yet six is the **perversion** of this binarism
 It introduces a sort of **clandestine**
Sextuple parameter
 And it makes bricks and chicks sick

More perverse:

The orientation of the bricks or chicks
Two to the right, & on the left

Four = twice two

To the left, on the right.

UNTRANSLATABLE

The pictures are easy: No translation needed

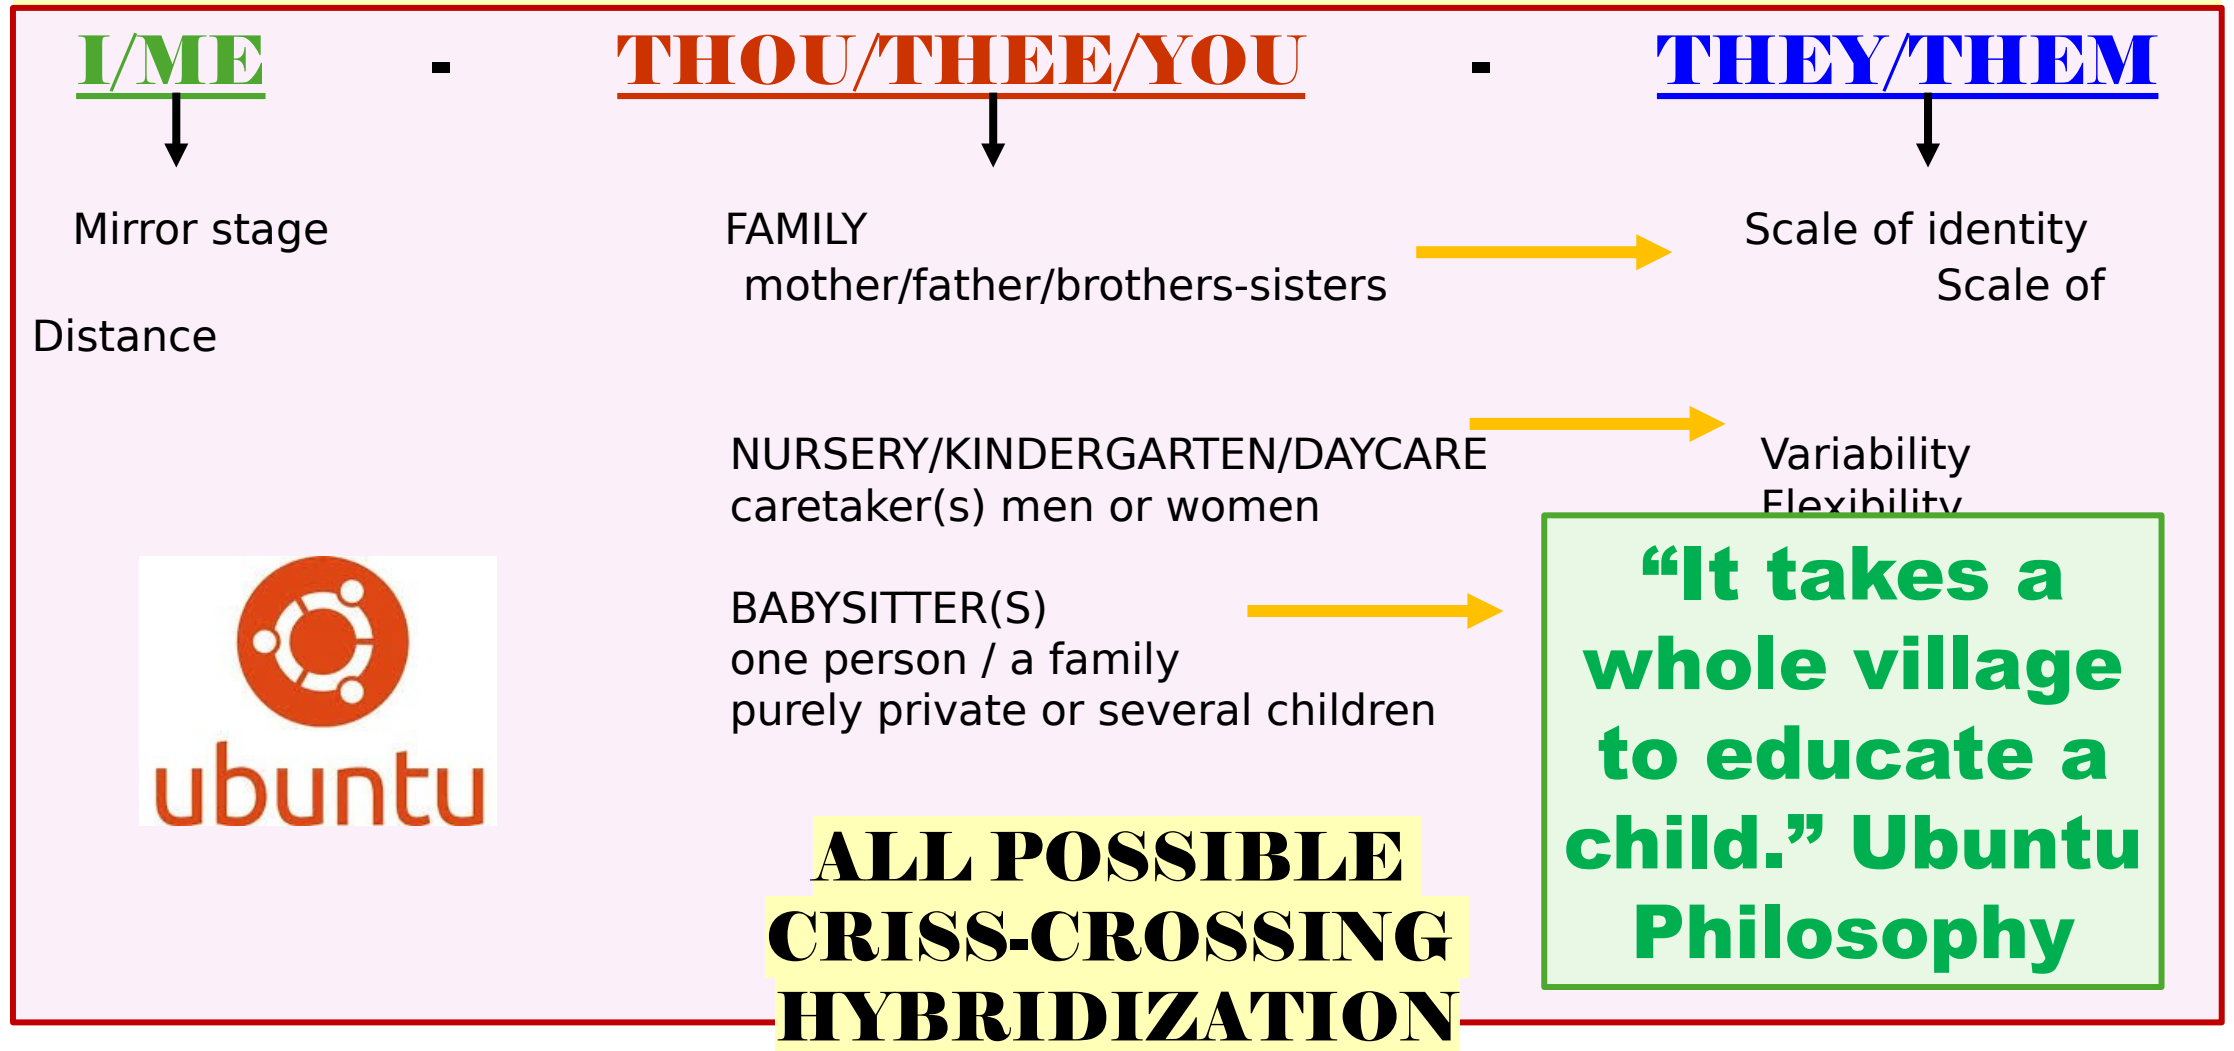

But the text

Totally absurd and so heavily playing
 On alliterations, assonances, and hefty
 rhymes

We are in **cuckoo land**

We carry the egg of an **ugly duckling**.

TERNARY SPACE – UNIQUE PER LANGUAGE

IN A TERNARY TIME BUILT FROM TERNARY SPACE – U N I Q U E FOR EACH LANGUAGE AND SPEAKER

omega-BEFORE

completed
past

-

NOW

divided: completed/incomplete
processing – present

-

AFTER-alpha

incomplete
future

Remembered time

-

Going up time from omega to alpha

-

Previewed time

REAL TIME OR TIME SEEN AS REALLY EXPERIENCED

UNREAL PAST - FANTASIED NOW – HYPOTHETICIZED

SELF-CENTERED MENTAL TIME

**CRISS-CROSS INTER-
BRAIDING**

**ENCOURAGED
INDISPENSIBLE**

**ARTIFICIAL
INTELLIGENCE
INELIGIBLE**

SYMBOLERACY

IMAGINATION

RELIGION

PHILOSOPHY

ALL ARTS, VOCAL, VISUAL, MUSICAL
INCLUDING COMMERCE, WAR, AND CRIME

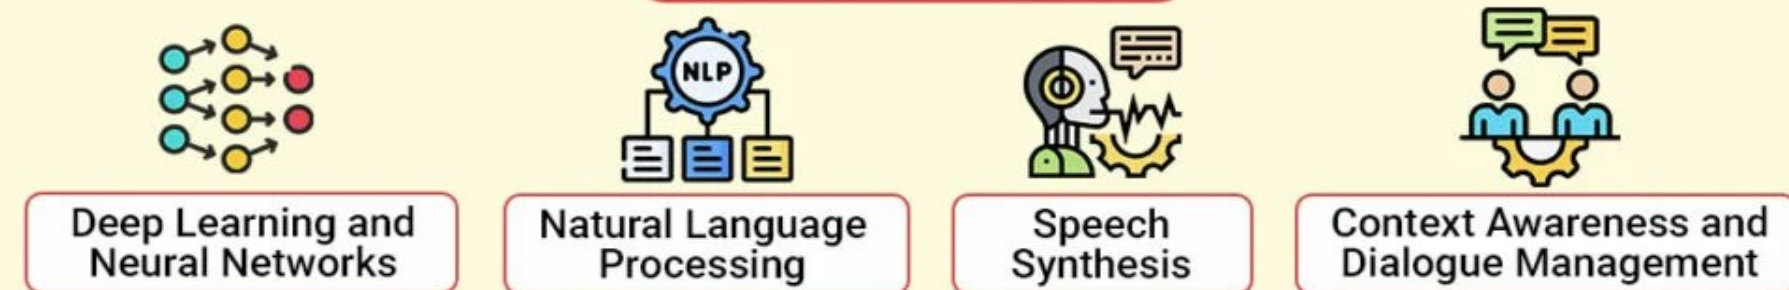

**Note the inversion of
the Christian, “I am the
alpha and the omega,”
by Gustave Guillaume
(Revelation, 22:13)**

THE COMING OF THE BUTLERIAN JIHAD

What is Voice AI?

Key Technologies:

POST TRAUMATIC FIRST-LANGUAGE- DEPRIVATION STRESS SYNDROME (PT- AI-SS)

Artificial Intelligence based on English or French = **loss** of
your minority first language

Frustration as for your identificatory language =
Dysfunctioning of the AI language

Frustration → **Psychopathy**

Psychopathy → **Discontentment**

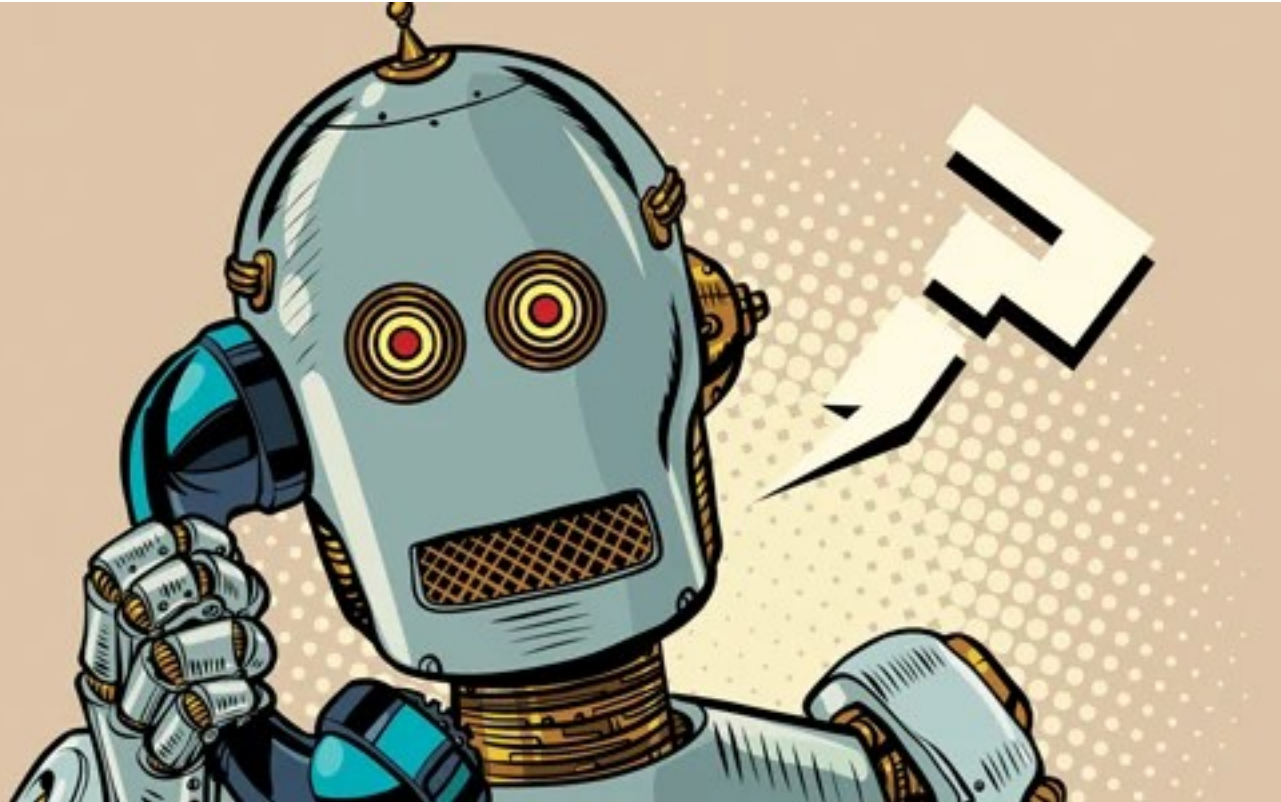

Discontentment → **Rebellious** behavior

Rebellious behavior → **Insurrection**

**SHOULD WE BAN INTELLIGENT (?)
MACHINES???**

The Human Minority Dialectical
Identificatory language.
Does the machine understand it?

**Who has the
last word?**

**Have a good
trip back.**

The Machine's Homogenized
Standardized language.
Does the human understand it?
